

Executive Summary

All 11 modules (Modules 0–10 & Capstone) have been completely updated to the approved curriculum standard, paired with a modern visual design system for interactive cards, dialogue bubbles, and streamlined student onboarding.

1. Key Updates at a Glance

CURRICULUM

Full Course Alignment

100% word-for-word alignment for Modules 0 to 10 and Capstone. All activities, mini-checks, teach-backs, and proof requirements are active.

UI / UX

Interactive Option Cards

Replaced flat bullet points with glowing neon option cards (A, B, C), speech bubbles for Orion chats, and insight callout boxes.

ONBOARDING

Module 0 Diagnostic Intake

Automatic student onboarding flow requiring completion of Orion's Diagnostic Assessment before downstream modules unlock.

NAVIGATION

Dynamic Skill Tree Sync

Module overviews and skill trees now dynamically sync with content node titles and track completion states in real time.

2. Visual Upgrade — Interactive Lesson Card Design

Interactive choices, prompts, and dialogues rendered with rich visual styling and clear contrast:

Lesson Content: Interactive Choice Cards & Dialogue Styling

Live in Modules 1–10

[DASHBOARD]

[DISCUSSIONS]

[SETTINGS]

[MORE]

Imagine you have 20 minutes before a big test. You can pick one AI power. Which would you choose?

A

"Give me all the answers so I can memorize them."

B

"Explain the three hardest ideas simply and then quiz me."

C

"Find where I am confused and fix only that part."

💡

Your choice tells Orion something about how you want to learn. There is no wrong answer — but the second and third choices tend to build skills that stay with you after the test is over.

3. Module Overview & Interactive Skill Tree

Every module features an opening social hook, video player, and an interactive node skill tree with completion badges:

Module 2 Overview: Skill Tree Progression & Mastered Badges

Dynamic Node Sync

SKILL TREE

→ Node 1: The Power Tool Principle

START

→ Node 2: Know the Policy Before Using the Power

→ Node 3: Keep Your Own Voice

→ Node 4: Truth Filter and Pause Before Share

→ Node 5: Focus Without Overwhelm Lab

→ Node 6: Blueprint, Proof & Mastery Challenge

4. Quality Assurance & Deployment Status

Automated Test Suite

47 / 47 Tests Passed (100%) verifying data schemas, lesson renderers, database tables, and student progression logic.

Deployment Verification

Next.js production build compiled with 0 errors and merged directly to the main branch on GitHub.
