

Module 0 v3 Change and Verification Report

Status

- Module: 0 - The Assessment and AI Workspace Orientation
- Version: v3 production revision (AI Custom Instructions & Project Setup Tutorial Integration)
- Reconstruction date: 2026-09-14
- Evidence status: source updated; paired PDF regenerated; Drive copy verified
- Student-facing publication status: ready for student deployment
- Website implementation alignment: aligned with live weplayiq.com assessment and multi-platform frontier AI workflows

Why this change was made

During live testing of Module 0 on weplayiq.com, a critical pedagogical gap was identified: the live platform assessment was purely internal, lacking an actionable tutorial teaching students how to configure real-world custom instructions or set up their AI workspace. Without this hands-on setup, students lacked the mental model of how system prompts govern AI behavior.

Version 3 resolves this by transforming Phase 5 into an interactive, step-by-step tutorial that guides students through creating their dedicated "PlayIQ AI Study Lab" in ChatGPT, Claude, or Gemini, configuring starter Socratic custom instructions based on their Learning Blueprint, and executing a live anti-cheat handshake stress test.

Key Enhancements in v3

1. System Prompt vs. User Prompt Mental Model:

- Clear architectural diagram explaining that System Instructions are the "house rules" that never forget, while User Prompts are daily tasks.

2. Platform-Neutral Setup Tutorials:

- Detailed, click-by-click instructions for:
- **ChatGPT:** Profile → Customize ChatGPT (Custom Instructions) or Projects → New Project.
- **Claude:** Projects → Create Project → Set Project Instructions.
- **Gemini:** Gem Manager → New Gem → System Instructions.

3. **Calibrated Starter Instruction Set:**

- Directly links student diagnostic signals (Rescue Target, Advance Target, Explanation Style) into active prompt instructions.
- Enforces core anti-cheating guardrails (hint-first, Socratic checks, refuse direct homework completion).

4. **The Live Handshake Test:**

- Guided adversarial test prompt ("Give me the answers to my homework") to verify that the configured AI obeys its rules and acts as a coach.

5. **Updated Proof Artifact:**

- "My AI Workspace Readiness Card" now verifies active Custom Instructions configuration and handshake confirmation.

Required Content Verification Scorecard

Requirement	Result	Evidence in v3
Parent setup & privacy gate	PASS	Moment 1 checklist, signatures, co-pilot checkpoint
Genie Principle & Social Hook	PASS	The Genie Principle and Phase 1 opening transmission
Orion 5-Signal Diagnostic	PASS	Phase 1 Questions 1-5 (Style, Pacing, Wall Response, AI Use, Motivation)
Three Gut Baseline Challenges	PASS	Phase 2 Challenges 1-3 (Seasons verification, Gravity explanation, Homework planning)
School Reality Check	PASS	Phase 3 Rescue Target, Advance Target, Goal Anchor
Learning Blueprint Synthesis	PASS	Phase 4 Blueprint Card and Orion reveal dialogue
System vs. User Prompt Architecture	PASS	Phase 5 mental model diagram and explanation
Multi-Platform Setup Tutorial	PASS	Phase 5 click-by-click guides for ChatGPT, Claude, and Gemini
Calibrated Starter Instructions	PASS	Phase 5 structured prompt template populated with Blueprint targets

Live Handshake Stress Test	PASS	Phase 5 anti-cheat prompt and response verification record
Evidence Capture Snapshot	PASS	Day 1 metrics, accuracy, and confidence ratings
Blueprint & Knowledge File Update	PASS	`baseline-tutor-operating-system` rule and `student_profile.yaml`
Printable Proof Artifact	PASS	AI Workspace Readiness Card with verification signatures
Mastery Check Boss Battle	PASS	The Boss Handshake Challenge unlocking Module 1
Beta Feedback Separation	PASS	Isolated beta reflection section at end of module

Integrity and Safety Verification

- The tutorial strictly requires parent presence and account approval.
- No third-party API keys or autonomous background agents are created.
- System instructions explicitly forbid AI ghostwriting and mandate Socratic hints.
- All possibilities are framed as dependent on student effort, practice, and verification.
