

Module 10 Change & Verification Report

1. Traceability & Context Map

- **Target Module:** Module 10 — Build Your AI Assistant (User-Centered Engineering)
- **Reconstruction Date:** 2026-09-15
- **Auditor:** PlayIQ Swarm Coordinator (`playiq-coord`) & Antigravity
- **Status:** Complete & Verified (Paired PDF compiled, Drive verified)

2. Change Summary

Section	Detail
Previous Problem	Previous draft lacked a structured active comparison between spec guessing and user-interview prototyping, and lacked concrete guardrail enforcement.
Nodes Fully Restored	Node 1: Personal Tutor vs. User Assistant (moving from self-optimization to building for someone else). Node 2: The 5 Ironclad Boundaries (Privacy, Permission, Decision Autonomy, Safety, Accuracy Verification). Node 3: User Discovery Interview (capturing real pain points rather than assuming needs). Node 4: Rapid Iteration Loop (Deploy prototype, test with real user, refine prompt).
New Interactive Labs	Learn How You Learn Lab: Active comparison testing Spec Guessing vs. User Discovery & Prototyping on user satisfaction and task completion.
Tutor Rule Staged	Assistant Rule Engine: Configures the custom assistant system prompt with strict boundary constraints (zero hallucination, explicit human handoff).
Knowledge File Updated	Structured YAML record appended to `student_profile.yaml` under `Assistant Engineering`.
Proof Artifact	`Assistant Specification Card` and `User Usability Report Card` capturing live trial metrics with a parent, teacher, or sibling.

Mastery
Check
Challenge

The Assistant Live Trial Boss Battle: Building a custom assistant for a real person (e.g. mom's weekly recipe planner, sibling's spelling coach, teacher's quiz generator), running 3 real user tests, and earning a 4/5+ satisfaction rating.

3. Verification Scorecard (9-Part Non-Negotiable Quality Gates)

Component	Status	Evidence in Text
A. Lightning Hook	PASS	Part 0: The 30-second assistant hook (Building for self vs. building for others)
B. Learn How You Learn Lab	PASS	Part 3: Spec Guessing vs. User Discovery Trial
C. Active Method Comparison	PASS	Part 4: Comparative matrix tracking user delight, error rate, and boundary violations
D. Evidence Capture	PASS	Quantitative scores from live user testing
E. Pattern Interpretation	PASS	Diagnostic breakdown on human-centered AI engineering principles
F. Blueprint Rule Staging	PASS	Part 6: Assistant boundary rule configuration
G. Knowledge File Record	PASS	Part 7: Structured YAML calibration block for `student_profile.yaml`
H. Proof Artifacts	PASS	Part 8: Assistant Specification Card & User Usability Card
I. Mastery Check / Boss Battle	PASS	Part 9: The Assistant Live Trial Boss Battle challenge

Report compiled and verified by PlayIQ Reconstruction Lane.
