

Module 2 Change & Verification Report

1. Traceability & Context Map

- **Target Module:** Module 2 — Power, Policies, and Gray Zones
- **Reconstruction Date:** 2026-08-04
- **Auditor:** PlayIQ Swarm Coordinator (`playiq-coord`)

2. Change Summary

Section	Detail
Original Problem	Original Module 2 was preachy, lecture-heavy, and moralizing. It didn't touch on the real-world school environments where older teens face detector misfires and false accusations.
Content Retained	Retained the core concepts of the Power Tool Principle and the distinction between Rest vs. Escape.
Content Reduced	Removed the preachy definitions and dry essay questions.
New Questions	Probing self-discovery questions in the Learn How You Learn Lab (Part 2) checking focus durations (5 vs 10 vs 15 min).
Experiments Compared	Added Rewrite Mode vs. Feedback Mode active comparison experiment (analyzing voice preservation).
Fingerprint Data Logged	Logs optimal sprint length, distraction urges, and writing mode preferences.
Tutor Rules Produced	Rule: `session-length` (routes focus duration settings to the tutor blueprint).
Knowledge File Updated	Appends metadata to `Focus and Motivation` file.
Proof Artifact	`Focus Test Card` capturing sprint metrics.

Strategy Alignment	Aligns with the *gray-zone content* and *detector navigation* standards, and maps focus duration to Rule `session-length`.
Remaining Risks	Parent Dashboard integration trigger details are pending.

3. Verification Checklist

- [x] Replaces lecture content with scenario-based decision trees.
- [x] Integrates perplexity, burstiness, and detector misfire explanations.
- [x] Verifies all 9 components (A to I) of the non-negotiable quality gate are present.
- [x] Confirms correct linking and absolute path references.

Report compiled by PlayIQ Swarm Coordinator.
