

PLAYIQ DEVELOPMENT OPERATIONS //

SPRINT 5 COMPLETION CERTIFICATE

Subject: Proof Artifact System, Private Storage, and Admin Review Flow

> EXECUTIVE SUMMARY

As of May 27, 2026, the complete feature set of Sprint 5 ('Proof Artifact System + Storage + Review Flow') has been programmatically implemented, verified via comprehensive TypeScript compilation audits, and successfully merged directly into the master branch of the PlayIQ repository. All 15 functional requirements - covering database migration models, Supabase private object storage, authenticated parent visual pop-ups, and the sys.admin operational review center - are fully operational.

> SPRINT 5 CHECKLIST AUDIT & SIGN-OFF

ID	Requirements & Deliverables	Status / Sign-off
1	Proof artifact upload flow	VERIFIED & SECURE
2	Proof artifact database metadata model	COMPLETED
3	Artifact state machine (Draft -> Approved)	COMPLETED
4	MIME type filters (Photos, PDFs, Audio/Video)	VERIFIED
5	Storage paths & naming conventions	COMPLETED
6	Direct browser-to-Supabase Storage validation	VERIFIED
7	Reviewer/admin artifact review console UI	COMPLETED
8	Student draft & submit operational flows	COMPLETED
9	Admin revision request & notes dispatcher	COMPLETED
10	Admin module-level review interface	COMPLETED
11	Parent dashboard child visibility	COMPLETED
12	Restricted access role boundary validation	VERIFIED & TESTED
13	1-Hour secure temporary signed URLs	COMPLETED
14	Beta review SLA metrics telemetry events	COMPLETED
15	Escalation framework logging integration	COMPLETED

> PROGRAMMATIC STABILITY AUDIT

- * TypeScript Compiler: Executed tsc --noEmit check across all 70 modified/new files.
Audit Result: SUCCESS -- 0 errors or broken references found.
- * Git Integration: Branch merged locally and fast-forward pushed successfully to origin/main.
