

Sprint 5 Completion & Verification Report

Project: PlayIQ Platform
Subject: Proof Artifact System, Secure Storage, and Review Workflow
Completion & Audit Date: May 27, 2026
Status: Production Ready / Merged to Main

1. Executive Summary

This report confirms the successful implementation, testing, and production integration of the Sprint 5 deliverables (Proof Artifact System + Storage + Review Flow) for the PlayIQ platform. All codebase modifications have been fully tested, verified via TypeScript strict type checks, and merged into the main development line. The systems are active and ready for immediate use.

2. Scope & Implementation Audit Checklist

ID	Implemented Feature / Deliverable	Verification Status
1	Proof artifact upload flow	Verified & Completed
2	Proof artifact database metadata model	Verified & Completed
3	Artifact state machine (Draft -> Approved)	Verified & Completed
4	MIME type filters (Photos, PDFs, Audio/Video)	Verified & Completed
5	Storage paths & naming conventions	Verified & Completed
6	Direct browser-to-Supabase Storage validation	Verified & Completed
7	Reviewer/admin artifact review console UI	Verified & Completed
8	Student draft & submit operational flows	Verified & Completed
9	Admin revision request & notes dispatcher	Verified & Completed
10	Admin module-level review interface	Verified & Completed
11	Parent dashboard child visibility	Verified & Completed
12	Restricted access role boundary validation	Verified & Completed
13	1-Hour secure temporary signed URLs	Verified & Completed
14	Beta review SLA metrics telemetry events	Verified & Completed
15	Escalation framework logging integration	Verified & Completed

3. Build & Stability Verification

- TypeScript strict type checking successfully verified with zero errors across the entire codebase.
- Supabase migrations, storage RLS policies, and database table models fully initialized.
- Branch successfully merged and deployed to production environment.

CONFIRMATION STATEMENT:
This technical document serves as official confirmation of implementation and deployment completion.
